**JUST MANUFACTURING COMPANY – CuVerro Copper Nickel Sinks**  
**Cleaning Recommendations**

A couple of products we highly recommend for routine cleaning of our CuVerro Copper Nickel Sinks are Lysol Brand POWER & FREE MULTI-PURPOSE Cleaning Wipes with 1.10% Hydrogen Peroxide and the Clorox Commercial Solutions® Clorox® Hydrogen Peroxide Disinfecting Wipes.

To remove difficult surface stains we recommend cleaning the sinks with 3M's Green Scotch-Brite Heavy Duty Scrub Sponge with either of these Disinfecting solutions. Caution: Only wipe lightly with the scrub sponge in the same direction as the polished grain to maintain the finish.

The product information and where to purchase can be found at the following websites:  
<http://www.lysol.com/products/disinfectant-wipes/lysol-power-free-multi-purpose-wipes/>  
<http://www.cloroxprofessional.com/products/clorox-hydrogen-peroxide-disinfecting-cleaners/at-a-glance/>

Product Note: Copper surfaces are susceptible to staining and color variations (patina) over time. However, the antimicrobial properties - the primary benefit of this copper/nickel material - are NOT compromised as a result of the stains and potential discoloration. Proper application (use), care and maintenance is essential with copper/nickel alloys.

\*Laboratory testing has shown that when cleaned regularly CuVerro® copper surfaces: kill more than 99.9% of bacteria\* within 2 hours, and continue to kill 99% of bacteria even after repeated contamination. Testing demonstrates effective antibacterial activity against MRSA, Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, and E. coli O157:H7. CuVerro®, copper alloy surfaces have been shown to reduce microbial contamination, but does not necessarily prevent cross-contamination. The use of a copper alloy surface is a supplement to and not a substitute for standard infection control practices; users must follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces.

Copper alloy surfaces are for use only in non-food zone areas.

CuVerro® is a registered trademark of GBC Metals LLC, d/b/a Olin Brass. CuVerro® antimicrobial alloys are registered with the U.S. Environmental Protection Agency as antimicrobial under product registration #85353-5. Document approval #J-0001-1201.
