

Cu-WHLV-175-S-CP

HEALTHCARE PRODUCT

Made with

CuVerro® Antimicrobial Copper/Nickel Alloy

SPECIFICATIONS

- Top, bowl and apron surfaces - 18 gauge - CuVerro® antimicrobial copper material - continuously reduces bacterial* contamination, achieving 99.9% reduction within 2 hours of exposure.
- CuVerro® antimicrobial copper/nickel alloy.
- Exposed surfaces polished to a non-porous Hand-Blended Just Finish.
- Enclosure of 18 ga. type 304 stainless steel.
- Underside insulated for sound, and reduces condensation.
- Drain punched for Cu-J-ADA-15-FS copper nickel flat grid and Integra-Flow overflow system.

INCLUDES:

- **JSGN-6** Sensor-operated deck mounted gooseneck faucet chrome plated. Includes faucet, sensor assembly, slow-closing solenoid valve, plug-in power adapter or battery powered control module.
- **Cu-J-ADA-15-FS** copper nickel with flat grid strainer. 1-1/2" O.D. chrome plated tailpiece, 4" long. Integra-Flow overflow system included.
- **JTM-47** Anti-Scald mixing valve with bronze body with integral check valves and adjustment cap with locking feature.
- **JSPD-801** Hands-free soap dispenser, mutiviscosity, 900ml capacity.
- **JHD-ADA-1440** Automatic hand dryer. ADA Compliant. Operating voltage 110/120.
- **JGRB-24** copper-nickel grab bar, 24" long.

**Laboratory testing has shown that when cleaned regularly CuVerro® copper surfaces: kill more than 99.9% of bacteria* within 2 hours, and continue to kill 99% of bacteria even after repeated contamination. Testing demonstrates effective antibacterial activity against MRSA, Vancomycin-Resistant Enterococcus faecalis (VRE), Staphylococcus aureus, Enterobacter aerogenes, Pseudomonas aeruginosa, and E. coli O157:H7.*

CuVerro®, copper alloy surfaces have been shown to reduce microbial contamination, but does not necessarily prevent cross-contamination. The use of a copper alloy surface is a supplement to and not a substitute for standard infection control practices; users must follow all current infection control practices, including those practices related to cleaning and disinfection of environmental surfaces.

Copper alloy surfaces are for use only in non-food zone areas.

CuVerro® is a registered trademark of GBC Metals LLC, d/b/a Olin Brass. CuVerro® antimicrobial alloys are registered with the U.S. Environmental Protection Agency as antimicrobial under product registration #85353-5. Document approval #J-0001-1201.

Product Note: Copper surfaces are susceptible to staining and color variations (patina) over time. However, the antimicrobial properties - the primary benefit of this copper/nickel material - are not compromised as a result of the stains and potential discoloration. Proper application (use), care and maintenance is essential with copper/nickel alloys. Contact customer service for questions about the use, care and maintenance of copper/nickel sinks at custserv@justmfg.com or phone 847-678-5150.

HEALTHCARE PRODUCT

Made with
CuVerro® Antimicrobial Copper/Nickel Alloy

JSGN-6-AC - Sensor Operated Faucet with Control Module

Sensor-operated deck mounted gooseneck faucet. Chrome plated solid brass construction faucet body. Chrome plated spout 12-1/2" high from bottom of base (8-1/4" from base to aerator) with 5-3/8" reach. 2.0 GPM Laminar flow control.

Control module, AC powered vandal resistant with armored control/power cable. Power adapter, standard plug in type, provides 12V DC output. Slow closing solenoid valve, piston-operated, provides reliable smooth operation without water hammer. In-line filter with clean-out trap. Sensor range adjustable from 6" to 30". Automatic time-out feature adjustable from 0 (preset-active until no activity sensed) up to 60 seconds in 15 second intervals. Shut-off delay adjustable to 0, 1 (preset), 2, 4 or 8 seconds.

Battery powered unit available. Specifications same as above, except provides 6V DC and includes battery holder for four AA batteries in lieu of plug-in power adapter.

JTM-47 - Thermostatic Mixing Valve

Anti-Scald mixing valve with bronze body with integral check valves and adjustment cap with locking feature. 1/2" threaded union inlet and outlet connections. Temperature range from 60° to 120° F (16°C to 49°C). ASSE Standard 1016 Listed.

Cu-J-15-FS DRAIN: Copper-nickel drain with flat grid strainer. 1-1/2" O.D. chrome plated tailpiece, 4" long.

Cu-J-15-FS Drain

JT-150 - P-Trap

Chrome plated cast brass 1-1/2" P-trap with cleanout. Drain pipe of 17 ga. chrome plated brass.

JSPD-801 Hands-Free Soap Dispenser

Automatic sensor operated soap dispenser. Easily removable 900ml tank for refilling and maintenance. Requires 12" clear space between stainless steel surfaces. Uses (6) AA batteries included.

JHD-ADA-1440 Automatic Hand Dryer

ADA Compliant, surface-mount hand dryer. Brush stainless steel cover. Operating voltage 110/120.

CuJGRB-24 - 24" Grab Bar

Antimicrobial copper-alloy grab bar, 16 ga, 24" long.
