SCRUB SINK - OPTION DIGITAL TIMED CYCLE

-DTC Digital Timer with Timed Cycle

-DTC- Digital Timer with Timed Cycle

The digital timer is teamed with a timed cycle to expand the options available to the user.

Available as a factory installed option only, on both the J-770 Series sinks with sensor faucets and JKS-770 Series knee activated sinks. Digital timer automatically starts with faucet activation. When hands are removed from sensor range or knee panel is used to stop water flow, the display stops and is automatically reset for the next user.

Timed Cycle allows the user to select a pre-programmed scrub time of 3, 5 or 10 minutes. After selecting the Timed Cycle, water will be activated and the digital display will provide users elapsed scrub time. When the cycle has completed, the water flow will stop, and the digital time display will be reset for the next user. The Stop button allows users to cancel the selected cycle, stops the water flow and resets the display.

- Easy to read LCD display
- Digital display battery operated, 10 year typical expected life.
- Soft display backlight.
- Elapsed time resets automatically
- Low voltage, LED illuminated buttons for 3, 5 or 10 minute cycles and Stop button to cancel cycle.
- Available on sensor activated or knee activated scrub sinks.
- Available factory installed only on pre-piped Just scrub sinks. Note: not for use with manual override faucets
